About Me

Results-driven Frontend Developer with around 3 years of professional experience specializing in building high-performance, scalable web applications using **React 19, Next.js, and TypeScript**. Proven track record in both architecting **greenfield products from scratch (GraphQL)** and modernizing legacy multi-platform systems into robust React ecosystems (**OpenAPI/REST**). Equipped with full-stack capabilities (Node.js, PHP Laravel) and a passion for optimizing development workflows through **AI-assisted engineering (Cursor)**. Adept in Agile environments, dedicated to clean code, component-driven architecture, and delivering pixel-perfect, accessible user experiences.

Skills

Enterprise Skills: React · Next.js · TypeScript · Redux · REST API Integration
Chakra UI · Shadcn · Agile (Scrum, Kanban) · Git · Redux Saga · GitHub Copilot ·
Responsive Design · CI/CD · Web Accessibility · Unit Testing · Figma · Cursor

Secondary Skills: NodeJs · Express · PHP Laravel · Vercel · Render · MongoDB ·
Supabase · Bitbucket (pipelines)

Experience

Frontend developer

Assa Abloy | 2026 – present

- **Greenfield Product Development:** Actively involved from day one in architecting and developing a brand-new product from scratch using React 19 and TypeScript, leveraging GraphQL for modern, efficient data fetching.
- **Legacy Modernization & Platform Expansion:** Refactored legacy Blazor systems into modern React 19 applications across multiple platforms (Desktop, Kiosk, Tablet, and Mobile apps), streamlining integrations via OpenAPI-driven, type-safe REST API client generation.
- **AI-Driven Efficiency:** Accelerated development lifecycles and optimized code quality by integrating advanced AI-assisted coding tools (Cursor AI) into the daily workflow.
- **Design Systems:** Contributed to the implementation of a company-wide Design System and UI Component Library to ensure visual consistency and drastically reduce time-to-market.

Software Engineer – Frontend

Byborg Enterprises | 2023 – 2025

- Developed scalable, high-performance web applications using React 18, Next.js, TypeScript, and Redux.

- Integrated RESTful APIs built with Node.js and PHP, enabling dynamic, data-driven features.
- Implemented Matomo analytics to provide user insights and product optimization metrics.
- Collaborated in Agile (Scrum and Kanban) teams to deliver high-quality, on-schedule features.
- Ensured clean, maintainable, and reusable code following industry best practices.
- Enhanced UI/UX by improving accessibility, responsiveness, and cross-platform performance.
- Translated Figma designs into pixel-perfect, responsive components aligned with brand guidelines.

Frontend Developer Intern

Byborg Enterprises | Mar 2023 – Jun 2023

- Gained hands-on experience with React, TypeScript, Redux, and Chakra UI.
- Assisted in building reusable components and managing application state.
- Worked under mentorship to improve component architecture and clean code practices.
- Participated in code reviews and team meetings to enhance collaboration and technical quality.

Security Officer

Docler Holding | 2019 – 2023

- Ensured safety and security of personnel and property across multiple sites.
- Began studies in Software Information Technology while working full time.

Education

Software Information Technology – Associate's Degree

MATE University (Magyar Agrár- és Élettudományi Egyetem) | 2021 – 2024

Completed a multidisciplinary program combining software development, databases, IT systems, and business fundamentals. Developed a strong interest in web development and frontend engineering.

Additional Qualifications:

- AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services | 2026
- Fire Protection Officer | 2020
- Security Organizer | 2017

Languages

- English – Professional Working Proficiency
- Hungarian – Native
